COSTA FAMILY

PRODUCT STORY

The COSTA has application is a wide range of spaces including hotel rooms, foyers and lobbies and meeting rooms. It is simple in design but meets quality and comfort demands in hotel rooms, foyers, reception areas and meeting rooms. Much of the quality of this chair is hidden from view. The polyurethane foam is moulded directly over a steel frame to provide proper contour for the ergonomic shape and elegant design. This guarantees that the cushions are durable and comfortable. Further, elastic webbing is crafted around the frame and support the foam and enhance comfort.

OPTIONS

Powder coat or chrome legs, fabric options. To protect the environment Innova Group always recommend powder coat over chrome.
